Instructions for printing at home

The PDF pattern comes in two different sizes: A4 paper (21 x 29,7 cm) and Letter format (8,5 x 11 inches).

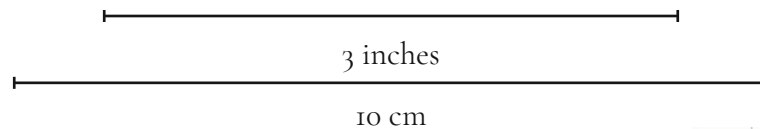

If you are printing the pattern at home, please make sure that the printer is set to:

“Actual size”

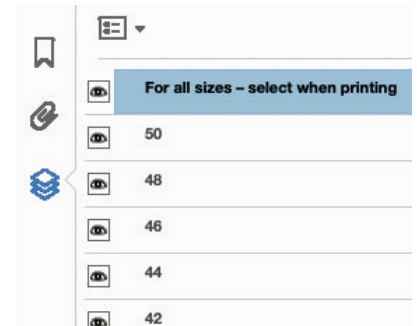

or else

“Custom Scale: 100%”

This way the pattern will be printed to scale and the size will not be distorted. A quick check is our 10cm / 3 inch size ruler, which is always printed on the first page of the pattern. Best to print out the first page by itself, check the length of the line to be sure that the pattern has not been wrongly scaled by your printing software.

This PDF pattern contains selectable layers that allow you to choose which size(s) you would like to print. This makes your pattern more comprehensible and saves ink. In Adobe Acrobat Reader go to **View > Show/Hide > Navigation Panes > Layers**. All sizes are selected by default. Deactivate the sizes you do not need. However, always leave the layer **“For all sizes – select when printing”** active!

On all pages you'll find the page number (grey) and an assembly line for the pattern. Spread out the pattern on the floor and place the pieces along the lines. The numbers run from top to bottom, the columns from left to right. Tape all the pages together to get the complete pattern.

Contact

Thank you so much for purchasing from our sisterMAG Patterns online shop. However, as we are still very young and a super small team, we ask for your help and understanding if something does not run as smoothly as you wish.

If you have any problems with a pattern, the download or payment, feel free to contact us at

mail@sistermagpatterns.com

or

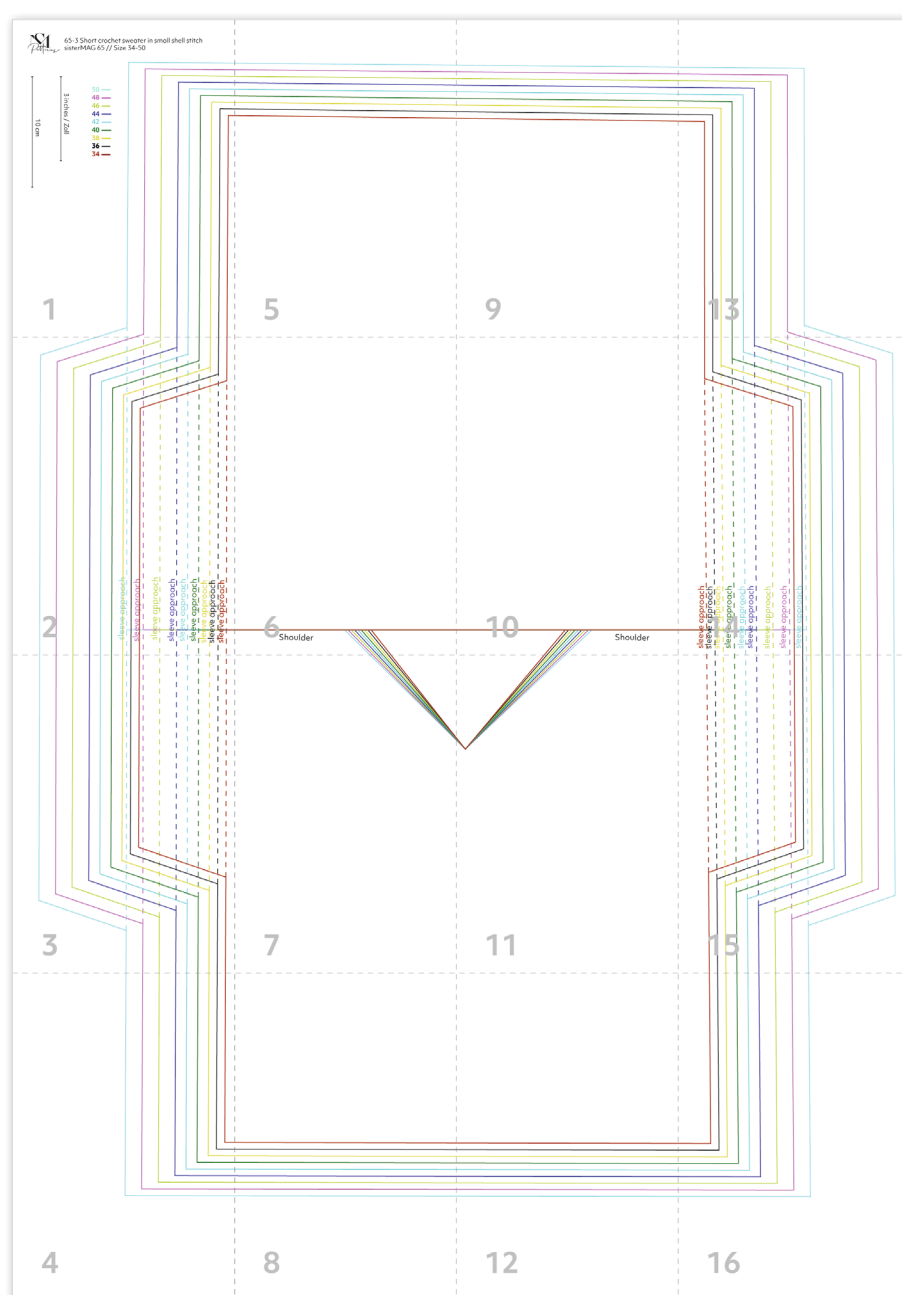

@sistermagpatterns on Instagram.

Yours, Toni, Thea & Evi and the sisterMAG Team

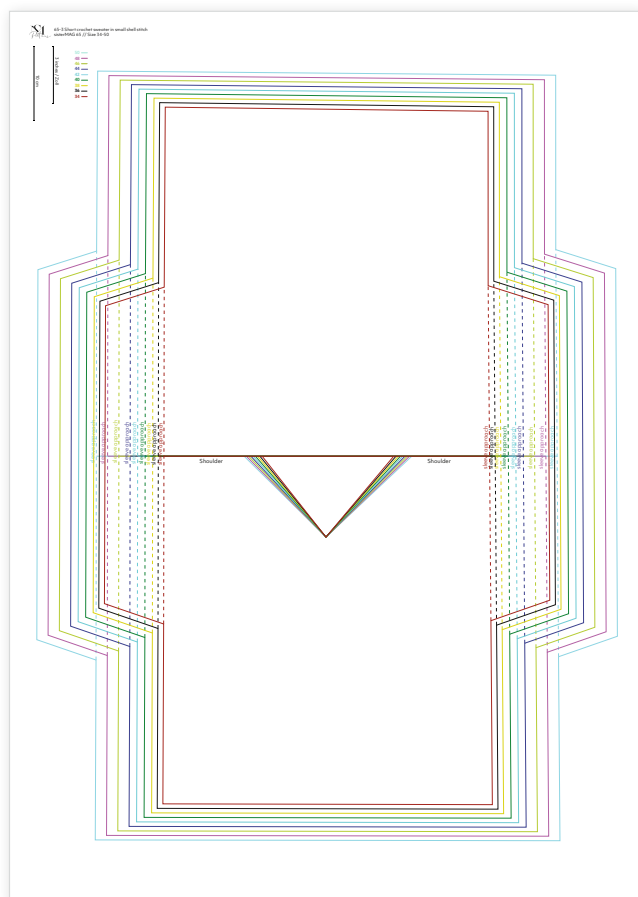

65-3 Short crochet sweater in small shell stitch

SISTER MAG ISSUE	65-3
SIZE	34-50

OVERVIEW CROCHET PATTERN

Printing at a copy shop

Your .zip file also contains a file in “copy shop” format, which you can print out at a local print shop or service such as patternsy.com if you wish. Our copy shop pattern files are usually A0 format (1189 x 841 mm), as this is a common large format for printing.

Printers have a variety of printing options, so it's best to google if your copy shop can print the pattern. Unfortunately, we can't customise our pattern files for every specific request or change the size for custom requests.

But we have compiled some important information for your copy shop below.

Number of pages: **1**

Size of format: **A0** (1189 x 841mm // 33-1/8 x 46-13/16 inches)

Paper type: Standard paper, e.g. 80g/m² copy paper. Ask for thinner papers or the cheapest option.

PRINTING WITH PATTERNSY.COM

We would also like to recommend patternsy.com for printing our patterns. This small, friendly British company ships worldwide at very low prices. They understand patterns and produce patterns on tissue paper at very high quality. You can find Su & Mark at patternsy.com

65-3 Short crochet sweater in small shell stitch

SISTER MAG ISSUE	65-3
SIZE	34-50

RECOMMENDED MATERIALS —

For this pattern you can use all yarns, depending on how warm you want the sweater to be. At the beginning you make a „stitch test“ with a 10cm/4in piece to know how many air stitches you have to cast on.

WOOL REQUIREMENTS —

10x10 cm / 4x4 in pattern crochet in the given pattern - this pattern is used as a basis for the number of cast on stitches and consumption of wool

TUTORIAL SWEATER —

First crochet the front part according to the pattern. Then crochet the back piece according to the pattern. Crochet the front and back pieces together at the shoulder line - join the pieces with a chain stitch. The thread when joining the parts must always go inside. This video shows how to join crochet pieces: <https://bit.ly/3O4p8l8>

According to the pattern, pick up both left and right stitches for sleeves and crochet sleeves in shell stitch on front and back pieces.

Crochet side seams of front, back and sleeves together with chain stitches.

65-3 Short crochet sweater in small shell stitch

HOW TO CROCHET

SMALL SHELL STITCH US TERMS

To make gauge swatch, chain to 10cm.

Row 1: 2 dc in 4th chain from hook, skip 2 chains, then 1 slip stitch (Slst), 2 chains (ch) and 2 double crochet (DC) in the same loop. Skip 2 hooks, in the 3rd hook 1 Slst, 2 ch + 2 DC in the same hook, continue like this.

End with one slip stitch and 4 chains, turn. Now you use the 2 chains of the row before to add 1 Slst, 2 ch + 2 DC in the same place. Continue like this.

Leave your swatch unblocked and measure how many rows fit into 10cm, at 2-3 different spots on your swatch. You can use these numbers to calculate how many chain stitches you need for the pattern and ~how much yarn you'll need for the sweater.

We have video tutorial for you:

<https://bit.ly/smp653-shellstitch>

Stitch into the 2 chain stitches of the previous row

1 Slip Stitch

2 chain

First Double Crochet

Second Double Crochet in the same place

End of row – slip stitch in the 4 chains of the previous row

Turn with 4 chains

Slip stitch in the 2 chains of the previous row

About sisterMAG Patterns

sisterMAG Patterns is the pattern shop and new website for DIY patterns and styles from the sisterMAG team, which has been publishing an online magazine for women in German and English for almost 10 years. For us, a sustainable and conscious lifestyle has always meant saying NO to fast fashion and YES to homemade, individual garments that you create yourself.

The sisterMAG and sisterMAG Patterns team is a family-run company from Berlin. Founded by sisters Thea and Toni and Toni's husband Alex, the whole family works on the company. While our father writes and edits articles, our mother Evi has been designing patterns for the magazine since issue 1. She studied

textile engineering in Berlin in the 1970s and 80s. Because of her origins in the GDR, she was never able to pursue a career as a fashion designer, but used her creativity at home to create the most elaborate garments and the craziest ideas. This passion helped Toni & Thea to publish more than 60 issues of the online magazine with extravagant cover dresses and many DIY sewing patterns.

Their ideas now flow into the patterns of sisterMAG Patterns - our shop for elegant do-it-yourself fashionistas looking for modern and interesting patterns.

We are delighted that you have completed a sisterMAG Patterns garment!
