

## INSTRUCTIONS

TITLE

### EMEBELLISHED HEADPHONES

FROM THE FEATURE

DIGITAL DIY

SISTERMAG

N°19

#### MATERIALS

- » headphones (with a flat surface to paste on)
- » gem stones (to buy in craft store)
- » glue gun or hot glue (2-3 sticks for one pair of headphones)
- » tweezers (to make working with gem stones more handy)

#### HOW-TO

1. Think about your design in advance and place the gem stones on the headphones how you want it to look in the end
2. Use the instructions of the glue gun - take care while using - it can easily burn your fingers. Use the tweezers to work more carefully
3. Apply small dots on the back of the gem stone. Try to work fast and press the stones to the headphones after applying the glue. Keep in mind to work exact and symmetrical
4. Start working from the inside to the outside
