TITEL

LONG GREY PLEATED SKIRT

FROM THE FEATURE

Patterns

SISTERMAG

N°32

MATERIALS

Adjust waist width according to fit

- ❑ 5 m Polyester material (found at Karstadt). Since you need a lot of material, you should look for something that won't make the skirt too expensive. I paid 8€ per meter for a high quality material. It should have a high concentration of polyester if possible, as the pleats will hold better.

HOW-TO

1. The fabric must be hemmed after cutting, then it can be sent for pleating.
2. »Plissee Kliss« – very fast and excellent quality pleating
3. Here is an example of the cutting procedure: bit.ly/2kwLtMx
4. I've taken a length of one meter and have a full circle.
5. Close only the side seams after pleating. I didn't sew on a zipper but left a single slit open.
6. Create a collar according to your waist size and sew it on. Do not forget to add loops for for a belt.
