- 
- STEP 1** Place the embroidery pattern under the fabric and draw on the fabric with a thin pencil. If you have a textile marker at home, you can also reverse the pattern and iron it on the fabric.
- STEP 2** Using a small embroidery hoop, put the fabric inside and secure.
- STEP 3** Divide embroidery yarn to three threads, thread a needle and make a knot at the end of the yarn.
- STEP 4** Embroider stalk with the stem stitch.
- STEP 5** Embroider the two leaves with the Fishbone Stitch, starting at the widest part of the leaf and working towards the tip.
- STEP 6** For the petals change the thread colour and embroider the petals with a French knot stitch on the marked points.
- STEP 7** Remove embroidery hoop and voila – the embroidered napkin is ready! Embroider the desired motif on two opposite ends of the napkin.
